PROJECT & WORKS

1. COLLEGE MANAGEMENT SYSTEM (PHP)

https://cms.tanemrahman.com/

I created College Management System project using raw php and javascript. Different types of roles have been created in this project. Eg: Admin, Staff, Teacher and Student. In this project student report, teacher attendance, student attendance, student result, admin panel, class management, department management and payment system have been developed.

2. WORDPRESS THEME DEVELOPMENT (WOOCOMMERCE)

https://delisale.tanemrahman.com/

I created DeliSale Online Shopping project using WordPress & WooCommerce. This theme is made for ecommerce multi-product business & added payment gateway, user login, invoice and report.

3. ONLINE JOB PORTAL PROJECT (CODEIGNITER 4)

https://careerhub.tanemrahman.com/

The online job portal system is a platform between job seeker(candidate) and job provider(employer). The Candidate or Job seeker can easily find and apply for job by login into system. The Employer or company can easily get expert employee from our job portal site by posting a job.

3. LOAN MANAGEMENT SYSTEM (PHP)

https://lms.tanemrahman.com/

Online loan management system for microfinance and lending companies. Manage borrowers, loans, and savings. See charts & reports. Increase repayments. Online Loan Management System OOP in PHP is a simple web system coded in a PHP programming language. This project contains an advance coding script that display fully function of the system. The system has many functionalities that can be use for a specific purpose.
